WORK EXPERIENCE

SDE

1ClickTech

07/2025 - Present

Gurugram

Achievements/Tasks

- Led frontend development of 3 enterprise products, building custom components and layouts from scratch using **Next.js**, **TypeScript**, and **React**, resulting in a **20%** faster development cycle and higher code reusability.
- Optimized performance by migrating data fetching from **Axios** to **RTK Query**, reducing API load times by **30%** and cutting down unnecessary network calls.
- Built scalable and performant frontends for platforms such as LMS, HRMS, and Ticket Management Systems, serving 2000+ active users.
- Structured and managed a **monorepo** for all products, centralizing shared code and UI components, which **reduced code duplication by 40%** and enabled seamless product switching with a unified layout.

Jr. Software Engineer

Cognizant Technology Solutions

12/2021 - 04/2024

Achievements/Tasks

- **Developed** an insurance application using **React** , enabling customers to generate quotes, calculate premiums, and purchase vehicle insurance.
- Redesigned and contributed to a **Talent Marketplace Portal** , including **dashboards** that allowed employees to discover, apply for, and track internal project opportunities.
- Migrated project from **vanilla JavaScript** to **Next.js**, reducing code size by **60%** through the creation of reusable custom components .
- Optimized web applications, achieving a **70% reduction in load times** by implementing techniques such as debouncing, lazy loading , and code splitting .

PROJECTS

Kon-Writer [🔗](#)

- Developed a **GenAI**-powered application powered with **Gemini** API that generates blogs, descriptions, SEO titles, and code based on user inputs.
- Integrated a rich text editor, allowing users to edit generated content in place and copy it as needed.
- Enabled distinct user profiles and a history section to retrieve previous queries for each user.
- **Next.js**, **TypeScript**, **Gemini API**, **ShadCn**, **TailwindCss**, **Context API**, **Clerk**.
